

## 关于推行电气火灾监控箱使用工作的通知

尊敬的主办单位、主场搭建商：

为落实消防主管机构关于加强临时用电管理相关要求，强化展会现场消防安全管理，消除安全隐患，防止消防安全事故，我司自 2021 年 3 月 1 日起推行使用电气火灾监控箱，申请及使用规则如下：

### 一、电气火灾监控箱的申请及使用规则

展台一级电箱仍旧由主办单位/主场搭建商统计需求后向我司申报，动力用电和照明用电应分开申请。申请照明用电电箱必须同时申请电气火灾监控箱。

展台二级电箱（照明部分）统一由电气火灾监控箱代替，参展商或搭建商无需再自行携带二级电箱（分路电箱）。申请方式与一级电箱一致，由主办单位/主场搭建商统计展会电气火灾监控箱需求数量，并在设施图纸上标注后统一向我司申报。

我司提供展台一级电箱和电气火灾监控箱的连接，电气火灾监控箱出线端由参展商或搭建商自行接驳。

特此通知。

## Notice on Further Strengthening

### Using of Distribution Box with Monitoring Function

Dear organizers, official constructor,

In order to practice related requirement from fire bureau about further strengthening temporary power management, improve the expos fire safety work, eliminate potential safety hazards, prevent fire safety accident, SNIEC will push forward the using of distribution box with monitoring function since 1<sup>st</sup> March 2021, application and usage rules are as follows:

#### 1. Distribution box with monitoring function application and usage rules

The first level electric box of the exhibition booth is provided by SNIEC according to the requirement and application of organizer/ official constructor as usual, which should be applied separately as power electric box and lighting electric box. A distribution box with monitoring function is necessary for a lighting electric box application.

The secondary level electric box (lighting part) of the booth is replaced by the distribution box with monitoring function and exhibitors or constructors do not need to carry secondary electrical box (shunt box) to the venue any more. The application method is the same as that of the first level electric box. The organizer/ official constructor shall apply the distribution box with monitoring function and mark it on the facility drawings.

The connection between the first level electric box and the distribution box with monitoring function is provided by SNIEC, the outlet of the distribution box with monitoring function shall be connected by the exhibitor or constructor.
